- 8 hardware colour options including a unique matt finish - Mannex Black.

Hardware Colour Options*

Mannex Black (Textured Finish) Black (Satin Finish) White Paperbark Cream Monument Woodland Grey Mill

(*) Colours indicative only, please refer to swatch for accuracy

ZipGrip™

gives you climate control in an outside space for all year round comfort.

- ZipGrip™ is a side retained product. A double spline guides the screen into the side channel for smooth and efficient operation.
- The streamlined side channels provide an uninterrupted view.
- Strong structural integrity supports an expansive 5.3mtrs width x 3mtrs drop without posts. (recommended maximum dimensions)
- Areas requiring a larger screen coverage can be accommodated by the installation of additional posts.
- The well-engineered bottom rail avoids bowing and deflection

Operation

Operate your ZipGrip™ using our unique central locking system which is a robust yet easy to operate mechanism, concealed in the bottom rail for a clean look and to protect working parts from the elements. Alternatively select motorization, controlled via remote device, mobile phone or voice activation.

Fabric

Select from a range of fabrics including Shaw's Dayscreen screen fabric available in 17 colours in 5% openness factor, and 7 colours in 1% openness factor, which co-ordinate with ZipGrip™ Hardware colours.

Choose from 8 colours which co-ordinate with leading exterior paint colours ie Colorbond.
